NEW YORK, N. Y.

It is not within the scope of this booklet to dwell at any length upon the processes or the formulas employed in the manufacture of clay and shale products, but to that individual who is at all familiar with either, or with the finished product itself, the following concisely given facts will be significant:

A Chemical and Physical Analyst would find that the formulas of most bodies made with clay and shale consist of only a portion of either, with a certain percentage of color stains and so-called grog. (Grog is usually defective clay-made articles ground to about the size of medium ground coffee.)

The color stains and compositions are of course to give the desired colors and tints to the finished product.

It is found necessary to mix grog with most clay and shale formulas in order to supply the factor which is lacking in their natural state, to produce compact, nondisintegrating bodies.

Grog may be dangerous to the result, particularly in the case of Tiles, where immunity from wear, destructive elements and stain are required. Inspection of a tile body made from a grog and clay formula may disclose that while the husk is more or less vitreous, under a powerful glass the body itself may be found to be honey-combed in appearance much like coral or vitrified sponge; obviously not desirable for the purpose.

The name—Spartan Ceramics is appropriately given our product because of its truly Spartan qualities. Being made of Pure Shale not polluted with grog* or diluted with color compositions an exceedingly dense, hard, impervious tile is obtained, absolutely free from laminations and absorption, that will withstand the hardest kind of wear and the destructive action of time and the elements.

Hard as is Spartan Ceramic in texture—in appearance it is a beautiful mosaic with soft harmonious blendings of shades—delightful for the floors and wainscotings of the private home, appropriate and practical for Public Buildings, Schools, Churches, Y.M. C.A. buildings, Club Houses and wherever charm, real service and reasonable first cost with minimum expense of upkeep is desired.

NOTE* The Clay and Shale found in the beds which we control are peculiar to themselves and of unusual high quality. In the manufacture of tile with this shale, by our process, no grog is used.

The Sparta Ceramic Company

Spartan Ceramics are sold through recognized trade channels only; the responsible Tile Contractors of every section of the country.

Samples, Catalogues, Literature and full information may be obtained from the factory's District Representatives.

Random Shades of Spartan Grey

THE Swimming Pool Room of the Cleveland Heights High School is wainscoted to the ceiling and its floor and spectator's gallery are tiled with Spartan Grey Ceramic selected to a reasonably uniform shade and modestly relieved by a belt course in the School's color.

This room deserves special consideration as an example of the quiet refinement and artistic interior treatment that is obtainable with Spartan Ceramics.

Tile installed by
THE WADSWORTH-ADDISON CO.
Cleveland, Ohio

Architects
WARNER & MCCORNACK
Cleveland, Ohio

Y. M. C. A., SELMA, ALA.

THE walls of the natatorium are wainscoted as shown above, with Spartan Grey Ceramics in a full range of shades. Design No. 111-B; producing a beautiful tapestry mosaic, paneled with a design border No. 210-B in Spartan colors Red, Grey and Brown.

The floor of the ambulatory around the pool is of Spartan Grey Non-Slip Ceramic with a Scum Gutter and Depth Marking panel of the same tile.

All of the Toilets, Shower and Drying Rooms are floored and wainscoted with Spartan Grey Ceramic and appropriate color relief.

Association Officials all over the country have heard of this beautiful and practical tile work.

Installed by
DAGOSTIN & ANGELINI BROS.
Montgomery, Ala.

Architect
WM. LESLIE WELTON
Birmingham, Ala.

Spartan Ceramics, selected in slightly random shades of Spartan Grey with modest color relief in the borders and inserts, were used extensively in The Army Y. M. C. A. at El Paso, Texas. The tile treatment of the Spectator's Gallery and around the doors and windows is especially interesting, working into the wainscot of the natatorium as a single unit.

The floor of the ambulatory around the pool is of Spartan Non-Slip tile with the overflow gutter and Depth Panels relieved with color.

The floors and wainscotings of the Corridors, Shower and Drying Rooms and Toilets are of Spartan Ceramics.

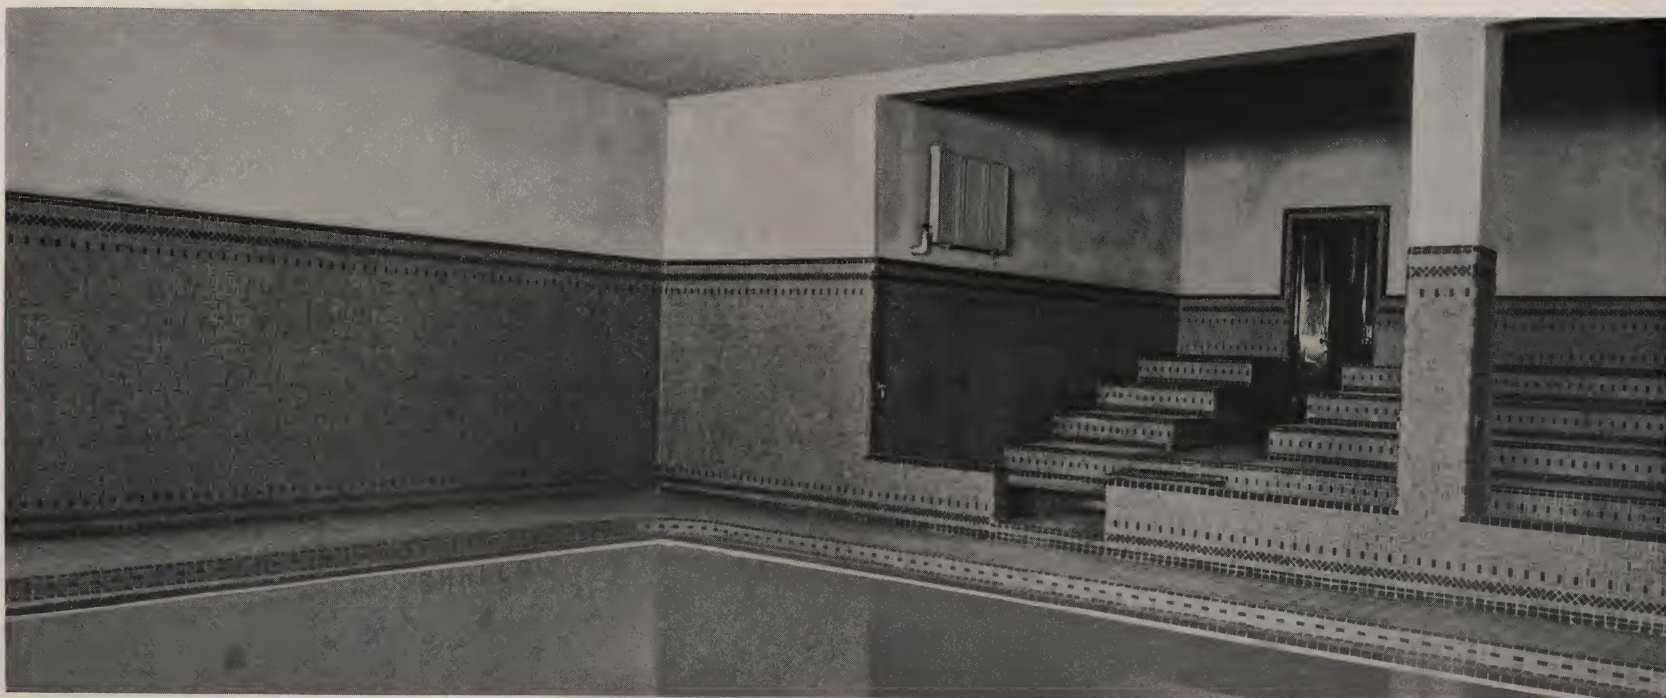

Tile Installed by

THE SOUTHWESTERN SASH & DOOR CO.

Architects LEHMANN & WUEHRMANN

El Paso, Texas

The decorative values and sanitary perfection afforded by the use of Spartan Ceramics can only be produced, in other materials, at some three times the cost. This, with the assurance that it will outlast the building in which it is used with no cost of upkeep, no crazing of surface and no change from its original appearance, recommends Spartan Tiles to the practical builder.

THE Porch floor and entrance step of this beautiful Southern Home are of Spartan Ceramics, selected in a harmony of random shades. This is another example of beautiful tile work most appropriately selected for its special setting and a floor that will always retain its original appearance and last indefinitely with no repairs or cost of upkeep.

Installed by THE INTERNATIONAL TILE CO. of Houston, Tex.

THE Packard Automobile Show Room, 7342 Stoney Island Avenue, Chicago, has a floor of SPARTAN GOLDEN PHEASANT CERAMIC in Design No. 130L as shown on the first color page of this folio. With the marvelous color blendings of a Golden Western Sunset is it any wonder that this is referred to as the most beautiful tile floor in Chicago.

Chicago

THE Vestibules, Entrance Halls, Corridors and Stair Landings in this modern Sacramento Avenue Apartment, Chicago, Ill., are
floored with Spartan Ceramics.

Tile Laid by
THE CHICAGO TILING CO.

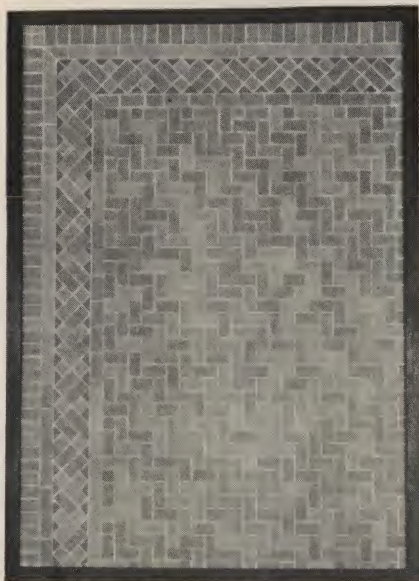

Architects
WEXLER & GORDON

The increasing quantities of Spartan Tiles being furnished for the better class Apartments indicates a growing preference for a more quiet refinement in color contrasts and designs than has prevailed in the past for floors and wainscotings in these modern homes.

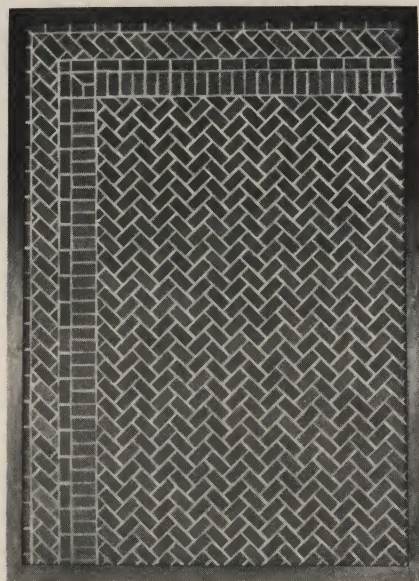

THE ERIE MANTEL & TILE CO., of Erie, Pa., were requested to furnish a floor for this store, that would harmonize with its decorations and furnishings, to be rich in appearance, but not to detract from the articles displayed for sale. A floor of six inch alternate blocks of SPARTAN GREY and BROWN. Design No. 136E laid diagonally, most satisfactorily supplied the requirements.
